IDENTIFIERS	*Library General Information Survey

ABSTRACT

Data are presented for 1,460 of 1,486 public libraries surveyed. The first five tables list data items on receipts, expenditures, resources, circulation, and staff for 334 individual libraries serving populations of 100,000 or more. The remaining 39 tables are aggregate data presenting inflated national estimates based on data for the 1,460 responding libraries. They are arranged according to the major categories of the survey instrument--public service outlets, staff, receipts, expenditures, collections, loan transactions, facilities, and library hours and days open per week. The appendices include a description of the survey methodology. (Author/KP)

NATIONAL CENTER FOR EDUCATION STATISTICS

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."—Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
WASHINGTON: 1978

FOREWORD

Separate surveys of public libraries were initiated by the U.S. Office of Education (USOE) in the 1940's and were conducted periodically during the 1950's and 1960's. The present survey was undertaken by the National Center for Education Statistics (NCES) in 1974 as part of the Library General Information Surveys (LIBGIS).

From 1938 to 1957 a separately established unit of USOE was put in charge of all library activities, including statistics. Surveys for different types of libraries were divided into separate publications and put on a 4- to 6-year cycle. Between 1958 and 1966 the financial support and the professional and statistical staff for library development increased substantially. College and university libraries were surveyed annually; other types of libraries about every 3 or 4 years.

In 1966 the responsibility for library statistics was transferred to NCES, which established a separate library statistics unit. To develop a uniform system of reporting, NCES had to determine how many and what kinds of library data items were currently collected by whom and how frequently. For this purpose, NCES collected these data and published the National Inventory of Library Statistics Practices.

With the results of this survey, NCES designed the first drafts of a Library General Information Survey (LIBGIS) form for public, school, academic and special libraries. During 1972-73 two pretests were conducted--the LIBGIS Demonstration Project and the LIBGIS State Participation Project.

The Learning Resources Branch implemented the Library General Information Survey (LIBGIS) system in 1974. The purpose of the LIBGIS system is to collect comparable library data for public and privately controlled libraries and information centers and for library development activity at the Federal, State, and local levels. This concept has received endorsement by USOE's Bureau of Libraries and Learning Resources, other Federal library agencies, State library agencies, and representative leaders in the library community.

The data in the publication are reported for fiscal year 1974 and cover basic statistics on library collections, staffing, expenditures, receipts, loan transactions, physical facilities, and service hours.

Appreciation is expressed to the statistics committees of the national library associations, to State library agencies, and to the many librarians, State agency personnel, and cooperating organizations that participated in and made the accomplishments of this sample survey possible.

Francis V. Corrigan, Acting Director
Division of Multilevel Education
Statistics

Frank L. Schick, Chief
Learning Resources Branch

Composition of the Public Library Professional Staff	2

Text Tables

A. Number and percent of full-time and part-time public library professional staff, by highest earned degree	3
B. Number of full-time and part-time public library technical, clerical, and other staff, by population of area served	3
C. Number of full-time and part-time public library plant operation and maintenance staff, by population of area served	4
D. Average number of direct circulations and interlibrary loans for public libraries, by population of area served	6

Basic Tables

Page

Note.--All tables are for the United States, fiscal year ending in 1974, unless otherwise indicated.

1. Population of area served, number of service outlets, and selected indexes based on population of area served, by specified public libraries and by State or other area and location: Fall 1974 or fiscal year ending in 1974..... 8

2. Full-time-equivalent (FTE) numbers of library professional staff (by sex and highest earned degree), other library staff, and plant operation and maintenance staff, for specified public libraries, by State or other area and location: Fall 1974..... 15

3. Total receipts, operating expenditures, by major category and capital expenditures, for specified public libraries, by State or other area and location..... 21

4. Holdings at end of year, loan transactions, seats available for library users, and hours open per typical week, for specified public libraries, by State or other area and location..... 27

5. Numbers of public libraries and numbers of public service outlets, by metropolitan status and population: Fall 1974..... 34

6. Selected percentiles and mean number of total public service outlets and of central and branch public libraries only, by metropolitan status and population: Fall 1974..... 35

7. Full-time-equivalent (FTE) number and percent distributions of public library staff, by major staff categories and by metropolitan status and population: Fall 1974..... 36

8. Full-time-equivalent (FTE) and mean number of public library professional staff, by sex and highest earned degree and by metropolitan status and population: Fall 1974..... 37

9. Total and mean numbers of full-time, part-time, and full-time-equivalent (FTE) of part-time public library professional staff, by sex and by metropolitan status, and population: Fall 1974.... 38

10. Total and mean numbers of full-time, part-time and full-time-equivalent (FTE) of part-time public library professional staff with less than bachelor's and with bachelor's degrees, by metropolitan status and population: Fall 1974..... 39

Basic Tables--Continued

Page

11. Total and mean numbers of full-time, part-time, and full-time-equivalent (FTE) of part-time public library professional staff with graduate degrees and with graduate degrees in library/media area, by metropolitan status and population: Fall 1974..... 40

12. Number and percent distributions of public libraries, by full-time-equivalent (FTE) number of library professional staff and by metropolitan status and population: Fall 1974..... 41

13. Amounts of public library receipts and percent distributions, by source and by metropolitan status and population..... 42

14. Amounts of public library receipts from Federal sources and percent distributions, by category and by metropolitan status and population..... 43

15. Number and percent distributions of public libraries, by total receipt and by metropolitan status and population..... 44

16. Selected percentiles and mean total receipts of public libraries, by metropolitan status and population..... 45

17. Operating expenditures, by major category and capital expenditures for public libraries, by metropolitan status and population..... 46

18. Percent distributions of public library expenditures, by purpose and by metropolitan status and population..... 48

19. Number and percent distributions of public libraries, by total expenditures and by metropolitan status and population..... 49

20. Selected percentiles and mean total expenditures of public libraries, by metropolitan status and population..... 50

21. Number and percent distributions of public libraries, by total expenditures per person in population and by metropolitan status and population..... 51

22. Number and percent distributions of public libraries, by expenditures for salaries and wages of library staff (excluding plant operation and maintenance staff) per person in population and by metropolitan status and population..... 52

Basic Tables--Continued

Page

23. Number and percent distributions of public libraries, by expenditures for plant operation and maintenance per person in population and by metropolitan status and population..... 53

24. Number and percent distributions of public libraries, by expenditures for books per person in population and by metropolitan status and population..... 54

25. Selected percentiles and mean public library expenditures, total expenditures and expenditures for books, per person in population..... 55

26. Library resources, by major category of books, periodical subscriptions and audiovisual materials, for public libraries, by metropolitan status and population of area served..... 56

27. Library resources, by major category of microforms for public libraries, by metropolitan status and population of area served..... 57

28. Library resources, by major category of bound periodicals and all other library materials for public libraries, by metropolitan status and population of area served..... 58

29. Number and percent distributions of public libraries, by volumes of books held at end of year and by metropolitan status and population..... 59

30. Number and percent distributions of public libraries, by titles of books held at end of year and by metropolitan status and population..... 60

31. Number and percent distributions of public libraries, by volumes of books held at end of year per person in population, by metropolitan status and population..... 61

32. Number and percent distributions of public libraries, by number of titles of periodical subscriptions held at end of year per 1,000 persons in population, by metropolitan status and population..... 62

33. Selected percentiles and mean volumes of books added during the year by public libraries, by metropolitan status and population..... 63

34. Selected percentiles and mean volumes held at end of year by public libraries, by metropolitan status and population..... 64

Basic Tables--Continued

Page

35. Selected percentiles and mean titles of books added during and held at end of year by public libraries, by metropolitan status and population..... 65

36. Numbers of direct circulations of all materials to library users, of interlibrary loans provided to other libraries, and received from other libraries, and of bulk loans received from other libraries by public libraries, by metropolitan status and population..... 66

37. Selected percentiles and mean direct circulations of all materials to library users by public libraries, by metropolitan status and population..... 67

38. Selected percentiles and mean interlibrary loans provided by public libraries to other libraries and received from other libraries, by metropolitan status and population..... 68

39. Median and mean of net area in square feet assigned for library purposes, of total length in linear feet of shelving available for library materials in public libraries, and number of seats available for public library users, by metropolitan status and population: Fall 1974..... 69

40. Number and percent of distributions of public libraries, by net area in square feet assigned for library purposes and by metropolitan status and population: Fall 1974..... 70

41. Number and percent distributions of public libraries, by total length in linear feet of shelving available for library materials and by metropolitan status and population: Fall 1974..... 71

42. Number and percent distributions of public libraries, by number of seats available for library users and by metropolitan status and population: Fall 1974..... 72

43. Number and percent distributions of public libraries, by number of hours open per typical week and by metropolitan status and population: Fall 1974..... 73

44. Number and percent distributions of public libraries, by number of days open 2 hours or more per typical week and by metropolitan status and population: Fall 1974..... 74

ACKNOWLEDGMENTS

This report was made possible by the cooperative endeavors of many individuals in the National Center for Education Statistics (NCES). For the present report, the following individuals made contributions of particular note:

Augustine B. Rogers, Program Assistant, maintained the control log and assisted in checking the tables.

Ruth D. Minnis was the typist who prepared the manuscript and tables for editing and review.

Sheila O. Myers was the typist who prepared the manuscript for printing.

INTRODUCTION

The universe for the Survey of Public Libraries, LIBGIS I, consisted of 8,307 libraries. The data for this survey were collected from 1,460 responding libraries out of a sample of 1,486 libraries. The 334 libraries serving populations of 100,000 or more were selected with certainty, and the remaining 1,126 were selected as part of a stratified random sample of libraries serving populations under 100,000. The response rate for the survey was 98 percent.

Tables 1-4 present selected data items on receipts, expenditures, resources, circulation, and staff for the 334 individual libraries serving populations of 100,000 or more.

Tables 5-44 are aggregate data presenting inflated national estimates based on data for the 1,460 responding libraries. These aggregate data are arranged according to the major categories of the survey instrument, i.e., public service outlets, staff, receipts, expenditures, collections, loan transactions, facilities, and library hours and days open per week.

Public Service Outlets

The total number of public service outlets for all public libraries was 89,142. Of this total, 8,307 were central libraries, 5,852 were branches, 66,276 were bookmobiles 1/, and 8,707 were other kinds of outlets. See tables 5 and 6 for further details.

Library Staff

Approximately 118,000 library positions are indicated for the following three categories: (1) Librarians, Media and Audiovisual Specialists, and Other Professionals (professional); (2) Technical, Clerical, and Other Library Staff (paraprofessional); and (3) Plant Operation and Maintenance Staff (Operation and Maintenance). These groups are represented in the following statistical breakdown:

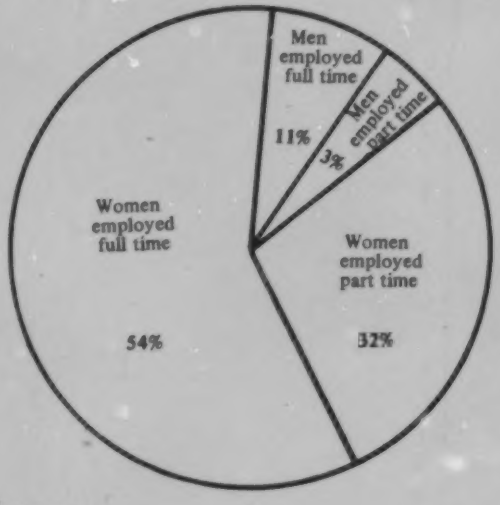
Group	Number	Percent
Professional	44,949	38
Paraprofessional	63,801	54
Operation and Maintenance	9,208	8
Total	117,958	100

1/ Although bookmobiles represent the largest grouping of public service outlets, the expenditures, collections and physical facilities data are not broken out from the data of the central libraries. The rationale is that these outlets are an extension of the central library or system and an integral part of such.

Professional Staff

The total number of professional persons employed in public libraries in 1974 was approximately 45,000. Of that total, approximately 29,000 were full-time professionals. The 16,000 part-time professionals equate to approximately 7,150 full-time positions. The total full-time-equivalent (FTE) professional staff was estimated at approximately 36,135. Women comprised about 86 percent of the professional work force; and about 32 percent of the total professional work force was comprised of women employed part time, and only 3 percent of of men employed part time. The figure below shows the full-time/part-time and men/women make up of the professionals employed in the public libraries.

Figure--Composition of the public library professional staff*



*approximate percents

Under two-fifths of the professional staff have less than a Bachelor's degree, one-fifth have Bachelor's degrees, and just over two-fifths have graduate degrees. Of the approximately 18,300 professionals with graduate degrees, all but 4.5 percent have those degrees in library/information science and related fields.

Professionals with less than a Bachelor's degree contain the largest group of part-time employees in the professional library work force, with the smallest part-time group among those with graduate degrees. For further details see table A and tables 7-12.

Table A.--Number and percent of full-time and part-time public library professional staff by highest earned degree

Professional Staff	Number	Percent
Total staff	44,949	
Less than Bachelor's degree	17,526	100
Full-time	7,305	42
Part-time	10,221	58
Bachelor's degree	9,097	100
Full-time	5,805	64
Part-time	3,292	36
Graduate degree	18,327	100
Full-time	15,860	87
Part-time	2,467	13

Technical, Clerical, and Other Library Staff

There were approximately 64,000 technical, clerical, and other library staff employed in public libraries in 1974. The average number of paraprofessionals nationwide was 8 per library. However, as can be seen in table B, the average number of paraprofessionals per library varied extensively from the larger to the smaller libraries. 2/ Over half (55 percent) of the paraprofessionals were employed part time.

Table B.--Number of full-time and part-time public library technical, clerical, and other staff, by population of area served.

Population of area served	Number of libraries	Full-time staff	Part-time staff	Total staff	Average Number of staff per library
All public libraries	8,307	28,910	34,891	63,801	8.0
500,000 and over	50	10,233	7,318	17,551	351.0
250,000-499,999	64	3,715	2,802	6,517	101.0
100,000-249,999	220	4,972	4,938	9,910	45.0
50,000-99,999	436	4,016	5,221	9,237	21.0
25,000-49,999	740	3,259	5,249	8,508	11.0
10,000-24,999	1,367	2,108	5,107	7,215	5.0
Under 10,000	5,430	607	4,256	4,863	0.9

2/ The term "larger libraries" refers to those serving a population of 100,000 and over, and "smaller libraries" refers to those serving a population of under 100,000.

Plant Operation and Maintenance Staff

There were approximately 9,200 plant operation and maintenance staff in public libraries in 1974, with an average nationwide of one maintenance staff member per library. Almost half (49 percent) were employed part time. Table C shows a further breakdown for all population groupings.

Table C.--Number of full-time and part-time public library plant operation and maintenance staff, by population of area served

Population of area served	Number of libraries	Full-time staff	Part-time staff	Total staff	Average Number of staff per library
All public libraries	8,307	4,711	4,497	9,208	1.0
500,000 and over	50	2,226	364	2,590	52.0
250,000-499,999	64	412	157	569	9.0
100,000-249,999	220	552	375	927	4.0
50,000-99,999	436	496	364	860	2.0
25,000-49,999	740	469	840	1,009	1.0
10,000-24,999	1,367	374	779	1,153	0.8
Under 10,000	5,430	182	1,918	2,100	0.4

Library Receipts

Over three-quarters of all public library receipts were from local sources. The local receipts were more than 11 times the amount of the receipts from State sources, over 10 times the receipts from the Federal Government, and over 7 times those from gifts, donations, and other sources. Revenue Sharing accounted for 70 percent of the total Federal receipts, with slightly over 40 pecent for operating expenditures and slightly under 30 percent for capital expenditures, and 30 percent for other receipts.

Only 2 percent of all public libraries had receipts totaling $1,000,000 or more. Nearly four-fifths of the 334 larger libraries had receipts of $400,000 or more, and, in contrast, less than 3 percent of the 7,973 smaller libraries had receipts of this size. Of these smaller libraries, 73 percent had receipts of less than $50,000 and 40 percent had receipts of less than $10,000.

Among the libraries serving less than 10,000 persons, 86 percent were outside of standard metropolitan statistical areas (SMSA's); all had receipts of less than $10,000. Receipts were in the range of $50,000 to $399,999 for 78 percent of those libraries serving a population of 25,000 to 49,999, and from $100,000 to $699,999 for 74 percent of those serving a population of 50,000 to 99,999. For further breakdown, see tables 13-16.

Library Expenditures

Over half of all public library expenditures were for salaries and wages. The expenditures were as follows:

Expenditures	Percent
Salaries and wages	53
Supplies and materials	17
Equipment	2
Plant operation and maintenance	10
Capital outlay	8
Other expenditures	10
Total	100

Total expenditures for all public libraries were over 1.1 billion dollars. Approximately 70 percent of all public libraries spent less than $50,000 for their total expenditures, and half of all public libraries spent $16,000 or less. 3/

Total expenditures per capita for 41 percent of all public libraries were less than $3.00 4/; for 68 percent, less than $5.00; and for 80 percent, less than $7.00. For approximately three-fifths, of all public libraries, less than $2.00 per capita was spent for salaries and wages, and for 45 percent, less than $.25 per capita was spent for plant operation and maintenance. Less than $1.00 per person was spent for books by slightly under three-quarters of all public libraries, and less than $.50 for over 40 percent of all public libraries. For further details see tables 17-25.

Library Collections

The total number of volumes of books held at the end of 1974 was approximately 390 million; titles of periodical subscriptions, 1.2 million; and titles of all audiovisual materials held at end of year, 8.3 million. The total number of bound periodical titles held at end of year was almost 360 thousand, and of bound periodical volumes, 7.6 million. These estimates for bound periodical volumes probably indicate more about the space occupied by these resources rather than the extent and depth of the holdings (See tables 26-35 for further details).

Library Loan Transactions

Approximately 893 million direct circulations of all materials to library users were estimated for the total universe of public libraries. There were approximately 5.4 million interlibrary loans reported between public libraries and other types of libraries, of which 3 million were received from other libraries. Bulk loans numbered 9 million.

3/ See table 20.
4/ See table 25. Total expenditures per capita for half of all public libraries were less than $3.60.

The average number of direct circulations of all library materials to library users and the average number of interlibrary loans is indicated in table D.

Table D.--Average number of direct circulations and interlibrary loans for public libraries, by population of area served.

Population of area served	Number of libraries	Average number of direct circulations	Interlibrary loans	
			Average number provided/lib.	Average number received/lib.
All public libraries	8,307	107,482	294	361
100,000 and over	334	2,234,792	1,316	1,434
Under 100,000	7,973	60,258	180	316

The averages for all public libraries were much lower than those for the larger public libraries because of the number of smaller libraries with smaller numbers of transactions (for further details see tables 36-38).

Library Physical Facilities

For all public libraries, the net area in square feet assigned for library purposes was approximately 80.5 million square feet. The total length of shelving available for library materials was approximately 54.8 million linear feet, and the total number of seats available to library users was approximately 700 thousand (for details by metropolitan status see tables 39-42).

Library Hours and Days Open per Week

Of the 8,307 libraries, 3,600 were open 40 or more hours per week. Of the 4,700 libraries open less than 40 hours per week, 4,400 were in the lowest population size group. All except two of the public libraries serving a population of 100,000 and over were open for at least 40 hours per week. Of these 334 larger libraries, 60 percent were open approximately between 60-70 hours per week. Among the 7,973 libraries serving less than 100,000 persons, 59 percent were open less than 40 hours per week, with 32 percent open less than 20 hours per week.

Nearly half of all public libraries were open 6 days per week for at least 2 hours. Two-fifths of the public libraries in the population category of 500,000 and over were open 7 days per week for 2 hours or more. See tables 43-44 for further details.

BASIC TABLES

Public Libraries Serving 100,000 and Over Population, by State

TABLE 1.--POPULATION OF AREA SERVED, NUMBER OF SERVICE OUTLETS, AND SELECTED INDEXES BASED ON POPULATION OF AREA SERVED, BY SPECIFIED PUBLIC LIBRARIES AND BY STATE OR OTHER AREA AND LOCATION: UNITED STATES, FALL 1974 OR FISCAL YEAR ENDING IN 1974

B. Standard Errors of Selected Categories for Public Libraries, by Metropolitan Status and Population

C. Reproduction of Survey Instrument and Instructions

APPENDIX A

Methodology

Preliminary to the LIBGIS I survey, a universe survey of all autonomous public libraries was conducted in 1973 1/. The universe of public libraries, thus created, contained the following data items: name, address, nonfederated library system, and the 1970 Census population figure for the area serced by each library. The response to the universe survey was 100 percent and the universe that was developed contained approximately 8,300 public libraries. The population size categories for this universe ranged from "under 10,000" to "500,000 and over" population served.

Stratification and Tabular Presentation Controls

For use in the Survey of Public Libraries, LIBGIS I, the public library universe was stratified by (1) regions: North Atlantic, Great Lakes and Plains, Southeast, and West and Southwest: (2) location 2/: Within SMSA-Central, Within SMSA-Other, and Other than SMSA; and (3) the population of area served: 500,000 and over, 250,000 - 499,999, 100,000 - 249,999, 25,000 - 49,999, 10,000 - 24,999, and under 10,000.

The tabular presentation of the data for this survey is within the confines of the above controls as seen in (the stubs of) the aggregated tables. The following further describes these controls:

(1) The four regions of the United States:

North Atlantic	Great Lakes and Plains	Southeast	West and Southwest
Connecticut	Illinois	Alabama	Alaska
Delaware	Indiana	Arkansas	Arizona
District of Columbia	Iowa	Florida	California
Maine	Kansas	Georgia	Colorado
Maryland	Michigan	Kentucky	Hawaii
Massachusetts	Minnesota	Louisiana	Idaho
New Hampshire	Missouri	Mississippi	Montana
New Jersey	Nebraska	North Carolina	Nevada
New York	North Dakota	South Carolina	New Mexico
Pennsylvania	Ohio	Tennessee	Oklahoma
Rhode Island	South Dakota	Virginia	Oregon
Vermont	Wisconsin	West Virginia	Texas
			Utah
			Washington
			Wyoming

1/ An autonomous library was defined for the universe of LIBGIS I surveys as a library governed by a single board of trustees or authority, and administered by a single director.

2/ SMSA (Standard Metropolitan Statistical Area) data was added to the Public Library Universe by matching it with the SMSA code in the Bureau of the Census' City Reference File (CFR).

(2) Three metropolitan-status categories:

Within SMSA, Central
Within SMSA, Other
Other than SMSA

A library was regarded as metropolitan or "Within SMSA" if it was located in a county defined as a Standard Metropolitan Statistical Area (SMSA). In New England, SMSA's, were determined on the basis of towns, rather than counties. A library located outside of the SMSA was classified as nonmetropolitan or "Other than SMSA."

Metropolitan libraries were further defined as "central" or "other": (a) if coterminous with or located within the boundaries of a central city (the large city comprising the hub of the SMSA), it was classified as Within SMSA, Central, (b) if located within the SMSA but outside the central city, it was classified as Within SMSA, Other, and (c) if, as in some large county systems, the population of a central city (1970 census) within the county library system was 50 percent or more of the county population, the system was regarded as Within SMSA, Central, if less than 50 percent, Within SMSA, Other.

(3) Number of public libraries, by metropolitan status and categories of population served:

Population of area served	Universe	Within SMSA, Central	Within SMSA, Other	Other than, SMSA
500,000 and over	50	46	4	0
250,000-499,999	64	45	19	0
100,000-249,999	220	133	50	37
50,000-99,999	436	131	147	158
25,000-49,999	740	96	297	347
10,000-24,999	1,367	92	587	688
Under 10,000	5,430	68	1,175	4,187

Sample Design

The sample design was a single-stage stratified random sample in which libraries within sampling strata were selected in a systematic manner using a random start. The libraries were stratified into regions, metropolitan-status cells, and population-served groups. (These categories are defined above.)

All libraries with a population served of 100,000 or more were taken with certainty. This group consisted of 334 libraries. The 1,126 libraries in the national sample portion of the survey were distributed as shown in the tabulation below:

Population of area served	Universe	National sample
50,000-99,999	436	194
25,000-49,999	740	207
10,000-24,999	1,367	223
Under 10,000	5,430	505

For population served of 100,000 and over, the universe figures are the same as the national sample figures.

Within each cell the libraries were ranked in descending order of population served; thus, after a random start, the sample libraries were selected on the basis of the sampling ratio for each cell. This procedure yielded a sample of 1,482 libraries. However, 19 libraries were no longer in operation or autonomous and 3 were nonrespondents, thus leaving a net sample of 1,460 libraries. The response rate of the survey was 98 percent.

Sampling Reliability

Estimated totals for each survey cell were arrived at by inflating the figures for each survey cell by the reciprocal of the probability of selection adjusted for nonresponse. Because the figures in this report are estimates derived from a sample, they are subject to sampling error. Caution should be exercised in interpreting figures that are based on a small number of cases. As in all surveys, the results are subject to errors of response, nonreporting, and sampling variability.

The figures presented in appendix B are standard errors computed for some representative characteristics. This table may be used as follows: The total number of professional staff for all libraries was 36,135, as shown in table 7 of this report. Appendix B indicates that the standard error for this estimate is 448. The chances are 68 out of 100 that the estimate would have been a figure differing from a complete census figure by less than 448. The chances are 95 out of 100 that the estimate would have differed from a complete census figure by less than 896 (twice the standard error).

Institutional Tables

Those libraries serving over 100,000 inhabitants are listed by State in the first four tables of this report. From the 334 libraries in this group, there were only three nonrespondents. Two of these libraries were added to the universe after the operational close-out, and the third library responded too late, with only partial unusable data.

The institutional tables 1-4, display data on public service outlets, per capita data for operating expenditures for books and other library materials, number of books held at end of year, loan transactions, and data on staff per 10,000 population. Data are presented for the full-time equivalent (FTE) numbers of library professional staff by sex and highest degree earned, other library staff, and the plant operation and maintenance staff. Data are presented for total receipts, operating expenditures, and capital expenditures for these larger libraries.

National Aggregate Data Tables

Tables 5-44 contain national aggregate data, based on the national sample of 1,460 libraries that was inflated to national estimates. The items in stub for these tables are arranged in the following sequence: (1) All Public Libraries, (2) Public Libraries within SMSA Central, (3) Public Libraries within SMSA-Other than Central, and (4) Public Libraries-Other than SMSA.

These four stub groupings are further subdivided as follows: 500,000 and over, 250,000-499,999, 100,000-249,999, 50,000-99,999, 25,000-49,999, 10,000-24,999, and under 10,000. The number of libraries in each of these subdivisions is given in the second column of each aggregate table.

There were no libraries in the category of population served of 250,000-499,999, and 500,000 and over in the strata for Public Libraries Other Than SMSA. No calculations were made for any stratum in which there were less than 37 responding libraries in the universe portion or less than 100 respondents in the sampled portion.

Using the Data Presented in the Public Libraries Survey, LIBGIS I Report

The summary tables will be of interest to those desiring an overall view of public libraries. The national sample was not designed to produce valid State estimates, although selected data for libraries serving a population of 100,000 and over has been arranged by State in tables 1-4.

For libraries serving 99,999 and under, the figures were inflated from the national sample and cannot be examined by State. Selected percentile tables have been included that will allow smaller libraries to compare themselves to other libraries of similar size. They can, thus evaluate their standing among these libraries in terms of resources, expenditures, receipts, and staffing within their metropolitan status and population of area served. Per capita data are given for such information as selected resources and expenditures. These data can give guidance to how a library, with its own per capita figures, stands relative to similar libraries.

APPENDIX B--STANDARD ERRORS OF SELECTED DATA CATEGORIES FOR PUBLIC LIBRARIES, BY METROPOLITAN STATUS AND POPULATION: UNITED STATES, FISCAL YEAR ENDING 1974
